BIPPI'S CAVE
Cheat Sheet
Version 0.9.9

The Cave is working as intended. Debugging is 99% complete.

This is essentially a Beta Release. If you find any bugs I've missed, please let me know.

_____

General Guidelines:

1. To start the game, put the BIPPIS.DSK into Drive 0 and enter RUN "BIPPIS.BAS".

2. The moment you exit the Cave, the game is over. There's no going back at that point. Be careful not to go East from the Warehouse (marked "W") accidentally.

3. North is up on the screen. Press the " Up-Arrow " to go North. Press the " Right-Arrow " to go East. Press the " Down-Arrow " to go South. Press the " Left-Arrow " to go West.

4. Press the " D " Key to go down to a lower level. Press the " U " Key to go up to a higher level.

5. Press the "T" Key to take whatever collectible item is in the cell under the Avatar.
